

## RLe Series

### Rugged Mobile Label Printers

Datamax-O'Neil by Honeywell adds to its reputation for rugged and reliable portable receipt printers with the RLe Series. RL3e (76mm or 3 in print width) and RL4e (102 mm or 4 in print width) are durable direct thermal printers with a rugged design and reliable performance that will continue to operate long after other printers have failed. We're so confident in the quality and long-term reliability of these printers that we include a two-year warranty free of charge. That's double what the competition offers.

Anybody who's ever been in a warehouse knows that when shipments are processed quickly and effectively, productivity is increased and errors are reduced. The RLe Series improves efficiency and productivity by allowing workers to print and apply barcode labels directly at the point of application. Using the RLe Series to print on-demand labels also eliminates the danger of mixing up batch-printed labels and can lead to big savings in shipping error avoidance. The printer can even be mounted on forklifts for added convenience and versatility.

We've made integration easy. Replace existing printers using built-in language emulations. The RLe Series is compatible with most popular warehouse management software programs, independent label-design programs and remote management packages.

*The RLe Series is built to keep pace in the busiest distribution centers, warehouses, supply chain and logistics environments.*

## FEATURES & BENEFITS

The RLe Series continues to print after 26 consecutive drops to concrete from 1.8 m (1 ft) even when at extreme temperature conditions.

The RLe Series comes with popular language emulations that allow you to easily replace existing printers in the workplace.

The lithium-ion battery offers maximum power capacity for an eight-hour shift, even under the toughest conditions.

Change paper roll with one hand. Speed label application with an intuitive LCD screen and a peel-and-present mechanism.

Co-engineered media supplies ensure optimum, trouble-free performance and guarantee the highest print quality and image stability.
