ECONOWAND ™

## Low-Cost Contact Scanner
For Bar Codes

Scans and decodes bar codes.

ID TECH's EconoWand Scanner is specially designed to deliver high-end performance at the lowest possible price. This decoded scanner combines exceptional decoding technology in an ergonomic lightweight package.

High-speed contact scanning.

The EconoWand enables quick contact scanning of bar codes of virtually any length. Low-quality or damaged bar codes, as well as small or high-density bar codes, can be read with exceptional speed and accuracy.

Programmable for specialized usage.

Not only does the EconoWand read and decode all popular bar code symbologies, it can also format the scanned data to meet the user's needs. Bar code symbologies are individually selectable, as are reading mode, beep tone, preamble/post-amble, and code ID. One-time settings are easily made by scanning set-up bar codes in the handy user's manual.

Ergonomic and lightweight.

This rugged wand scanner contains no moving parts, yet it is exceptionally lightweight and de-signed to fit comfortably in the hand for extended periods of usage.
