

IntelliTrack

Collect. Track. Manage.

IntelliTrack Fixed Assets

Overview

IntelliTrack's Fixed Assets software is designed to be used with portable barcode readers to provide a complete turnkey solution to manage assets. IntelliTrack modules are written with Microsoft® Access 2007 and include source code to customize the Fixed Assets system for specific needs. The IntelliTrack Fixed Assets portable software enables the portable barcode reader to collect inventory data automatically. IntelliTrack Fixed Assets provides for the collection and storage of user ID, asset number, location, status and even manufacturer, model and serial number if required, all with the accuracy, speed, and simplicity of barcodes. The IntelliTrack Fixed Assets software includes a PC compatible ready to run SQL Express to manage Fixed Assets data. The IntelliTrack Fixed Assets database includes standard reports, queries, and barcode label printing capabilities. With the Access user-friendly interface, the user can easily customize a database.

All IntelliTrack products allow concurrent connections meaning, the application can be installed and run on unlimited workstations. The number of workstation licenses purchased limits how many users can be on the system at one time.

Fixed Assets is wireless ready.

RF (WiFi) capability comes with every copy of full version DMS software for real time tracking. To utilize wireless features in IntelliTrack DMS software your portable data collection terminal (PDT), PDA, or handheld computer must have a line-mode capable Telnet client, such as Wavelink or Intermec TE2000. A Telnet client provides terminal emulation allowing your wireless IntelliTrack application to connect to a handheld computer running Windows® CE and Windows Mobile.

Added Features

As part of IntelliTrack's Data Management Solutions, Fixed Assets is available in a Lite version for smaller inventories. DMS Lite Software allows you to benefit from the full software version for half the cost. Fixed Assets Lite is limited to 500 assets in inventory at a time and does not include wireless features.

Lite
Version

Fixed Assets also includes Asset/Item ID receiving. This is a form on the workstation to help receive new assets into the system. This feature allows you to add multiple item numbers at once when receiving new inventory. Item ID receiving eliminates the need to enter the same item number for multiple assets over and over again.

Fixed Assets is available in RFID. IntelliTrack Fixed Assets RFID software provides enhanced functionality, including an all at once scanning of entire rooms and improved data security.

System Requirements

Component	Requirement
Computer & Processor	2.0 GHz Minimum
Memory	512 MB RAM, 1 GB or higher if running SQL and IntelliTrack software on same computer
Hard Disk	At least 3 GB or higher free disk space available
Drive	CD-ROM or DVD drive
Display	1024x768 or higher resolution monitor
