

H22

Beyond Smart,
It's Brilliant

- > **IDEAL TOOL FOR:**
- Logistics & Courier Services
 - Postal
 - Field Service & Field Sales
 - Facility & Security

The H22 is designed with the technology and ruggedness to meet the demands of businesses that deploy field workers. The interactive mobile computer with excellent reading and touch screen performance uses the latest Windows Mobile® 6.5.3 platform providing the latest technology for mobile applications.

As well as providing a stable platform for interacting with the operator, the mobile computer collects signatures and is able to take a photographic record of an observed event or issue - vital operations for a successful field-based solution.

Scanning

> LASER ENGINE

The integrated Opticon engine captures a wide range of linear barcode symbologies. The laser scan engine reads barcodes at a speed of 100 scans per second.

> 2D IMAGER

For more scanning options Opticon provides the model with a 2D imager. Besides linear barcodes, this engine also reads 2D and stacked codes, both from traditional media (labels etc.) as well as from the screens of other mobile devices.

> RFID

For rapid identification of RFID tagged items, use the H22 with RFID reader. This model is equipped with a SAM slot.

Designed to provide the safe storage of cryptographic keys and functions for H22 to access information securely in contactless applications, a SAM also enables secure communication between H22 and the host system to take place.

> 3.2 MEGAPIXEL CAMERA

The 3.2 megapixel color camera with auto-focus and flash light supports visual information to any issue.

> 3.7" BLANVIEW TOUCH SCREEN

The sharp 3.7" color display with touch screen is among the largest screens available for mobile terminals. It provides users with an extremely user friendly interface for any field worker application.

> IP 65 COMPLIANT HOUSING

With its rugged housing, the H22 can withstand multiple drops onto concrete from 1.5 meters as well as adverse environmental conditions, with its IP 65 compliant design.

> 2 KEYPAD VERSIONS

Maximize efficient data entry and choose the keypad that meets the requirements of your specific business applications. The H22 is available with an (alpha)numeric layout or a complete QWERTY keypad.
