

RFID UHF DESKTOP READER

The DLR-DK001 desktop reader is a multi-regional UHF RFID reader with an integrated antenna for short to medium range applications.

The reader is powered and controlled directly by a USB cable, thus allowing the module to read EPC Class 1 Gen 2 UHF RFID tags in an easy desktop environment.

Because of its low profile (1.5 cm / 0.6 in) and its size (approximately an A4 page), the DLR-DK001 reader is the perfect choice for various applications such as Point of Sale, Document Tracking, Tag Programming Stations and Access Control. The module can also be used as a building block for smart shelves and smart displays.

GLOBAL COMPLIANCE

Being compliant with both European and U.S. regulatory environments, the DLR-DK001 reader allows installations in various countries globally as needed by retailers, warehouses and other global organizations.
