

7001L 70" Interactive Digital Signage Display

The 7001L Interactive Digital Signage display combines an optical multi-touch touchscreen with a professional-grade, large format display in a slim, integrated package. For retail, hospitality, commercial real estate, education and other commercial applications, the large wide-screen format offers a high-quality, interactive canvas for attracting and engaging consumers. The 7001L offers system integrators and value-added resellers (VARs) a high performance solution that is easy to deploy and maintain. With a total thickness of 3.5 inches (89mm), the 7001L is compliant with the ADA requirement of less than 4" protrusion for wall-mounted products when used with a compatible wall-mount.

With a 700 nit LED panel, the 7001L is a bright, high quality display suitable for public environments. The optical touchscreen enables up to six simultaneous touches for multi-user interaction. This touch technology offers a fast and extremely sensitive response similar to the experience on mobile devices and is compatible with Microsoft Windows® 7 and Windows® 8 operating systems. The touchscreen is 4mm thick, fully tempered glass.

Optional, high performance computer modules are available which turn the 7001L into a completely integrated all-in-one computer—without the need for any cables or additional mounting hardware. Computer modules are available in a choice of two models: ECMG2-i3 based on a 3.3GHz Intel Core i3 processor and

HD2500 graphics; ECMG2-i5 based on a 3.6GHz Intel Core i5 processor and HD4000 graphics. The high performance, commercial-grade computer modules make the 7001L a reliable platform that is interoperable with most content management servers and supports optimal partitioning of locally cached and network streamed content.

Benefits:

- Professional-grade hardware including fully tempered touchscreen glass for improved durability to withstand the rigors of public use
- Thin (<4" mounted) design is attractive and compliant with ADA wall-mount requirements
- Reliable, integrated interactive digital signage solutions with optional NFC and RFID scanners and webcam kits
- Three-year standard warranty. Additional two-year warranty and on-site exchange available in USA. Extended advance replacement warranty options available worldwide.
- Remote management capability via USB/virtual serial port for touch and display; additional web-based services to be announced
- Intel OPS compliant with available adapter kit
