

XM70 Rugged Mobile Computer

More Power. More Flexibility.

As enterprise and government mobility requirements evolve at a rapid pace, protecting technology investments is more important than ever. When evaluating mobile computers, forward-looking organizations need to select a device that addresses both today's and tomorrow's business needs.

Designed to deliver maximum return on investment, the new XM70 provides support for Android™ and Microsoft Windows Embedded® Handheld 6.5 operating systems on the same device, allowing customers to future-proof their technology investment and eliminate the costs associated with forced application migration and expensive hardware upgrade. In addition, backward compatibility with XM66 accessories allows Janam's global customer base to reuse existing technology while cost-effectively upgrading to the latest mobile computing platform.

Pocketable Powerhouse.

Weighing less than 10 ounces and equipped with a full 3.5-inch display, the XM70 is designed to fit in the palm of the hand and can survive all-day use in challenging environments. The XM70 can withstand 4 foot/1.2 meter drops to concrete on all sides across a wide temperature range and is sealed against rain and dirt to IP54 standards. Choice of 2400mAh or 4000mAh Li-ion battery ensures uninterrupted operation throughout the workday.

Advanced 1D and 2D barcode scanning technology allows the XM70 rugged mobile computer to decode even the most difficult to read barcodes with extraordinary scanning speed and outstanding motion tolerance. A powerful ARM Cortex-A8 processor and double data rate (DDR) memory ensures reliable and powerful performance for complex applications. It's technology at work™.

The right features. The right price.
