NiceLabel
POWERFORMS DESKTOP

**Rapidly build custom labeling applications without programming**

The Full Spectrum of Labeling Software

NiceLabel

Professional label designer and graphical application builder

Professional label designer

PowerForms printing program

Benefits

Integrate with production systems

Integrate with production devices and software and use data from external sources on your labels or forward it to other business systems every time you print. Easily interface with bar code scanners, weight scales, PLCs, print applicators and other hardware.

Reduce development costs

PowerForms builds applications faster than programming languages such as C# or VB.NET. This reduces application development costs and time to deployment.

Eliminate label printing errors

Select the database record, see the label preview, and the printer status, and then print your labels. Less manual data entry and better label oversight makes a high level of quality control part of your normal printing process.

Build applications for touchscreens

Layout the user interface for keyboard, mouse or touchscreen compatibility. You can also deploy it as Rich Internet Applications (RIA) for use in a browser across the enterprise or in the cloud*.

*Web browser requires NiceLabel Portal (Private) or NiceLabel Breeze (Cloud)
