

EVERY FEATURE YOU NEED FOR
MEDICAL AND ENTERTAINMENT WRISTBAND PRINTING
AT AN AFFORDABLE PRICE

TDP-225W DESKTOP DIRECT THERMAL WRISTBAND PRINTER

TSC is proud to introduce the TDP-225W wristband printer to its line of world class desktop printers. This unique printer was developed specifically to meet the needs of printing wristbands for healthcare patient ID and entertainment wristband ticketing applications.

Unlike any other direct thermal sold, the TDP-225W features a small footprint that supports full 6.5" OD rolls of wristbands right out of the box. The easy-to-use design provide an easy-load spring loaded center biased wristband holder that supports 1" core that is common to full 6.5" OD rolls sold by major wristband manufacturers.

Other outstanding features include an LCD display to provide printer status, USB 2.0 and Ethernet connectivity. What if your customer does not have enough desk space for our

small footprint? The TDP-225W was designed to wall mount at no extra cost.

Worried about printing wristbands if your computer network fails? The TDP-225W can be optionally configured to print wristbands if your computer goes down. Simply call up a stored wristband printing program from within the printer, enter your patient or customer information via a PC keyboard, and continue to print the wristbands that your customer needs to operate its business.
