

ClipGem™

Model T-C912/-C916

For form data entry and simultaneous electronic signature capture

ClipGem is an electronic clipboard and signature capture pad that supports simultaneous electronic and ink-on-paper recording of signatures. Available in both letter- and legal-sizes, ClipGem is an excellent choice for use in applications where one party desires a paper copy of the document, while the other desires the benefits of a paperless transaction. ClipGem's ink-tipped active electronic pen captures the electronic signature in real-time as the user signs in ink on the page. ClipGem's paper-sized digitizer enables users to sign anywhere on a full page form without requiring any special alignment or orientation. Topaz's SigPlus software suite is bundled at no additional charge for a complete electronic signature solution.
