WWS100i

CORDLESS POCKET BARCODE SCANNER

Productivity Solutions for Small Businesses

The Wasp WWS100i barcode scanner is a small, sleek, cordless scanner that provides an error-proof way to streamline and simplify business processes. Built to fit in the palm of your hand, the lightweight, pocket-sized form factor combined with wireless connectivity makes the WWS100i an ideal general purpose barcode scanning solution for the mobile workforce. The cordless scanner allows you to accurately collect data on-the-go by integrating with smartphones and tablet devices.

The WWS100i's CCD scan engine scans all popular linear (1D) barcodes from near contact up to 5.5" away. Simply scan the barcode and transmit your data in real-time via wireless connectivity to an Android™ or iOS® device up to 33' line of sight. The WWS100i can easily read poorly printed or damaged barcodes with a Print Contrast Ratio (PCR) as low as 30%.

Durably designed with ABS plastic housing, the WWS100i can withstand multiple 5-foot drops to concrete – easily eliminating costly downtime. With a rechargeable lithium-ion battery, the pocket-sized scanner can handle up to 5,000 scans on a single charge and has a working life of 8 hours (1 scan/5 seconds). Easily know power status, wireless connectivity, and if your barcode was detected using the WWS100i's LED and beep tone indicators.
